- Blk 10 Lot 3 Pagsinag Ave. St. Pagsinag Northeast, Timalan Balsahan, Naic, Cavite 4110 PH

CORE SKILLS

- Programming & Frameworks: PHP, Laravel, JavaScript, HTML5, CSS3, Bootstrap, MVC, C#
- Database & APIs: MySQL, SQL, Stored Procedures, RESTful APIs, Third-Party Integrations
- Web & Application Development: Full-Stack Development, SaaS, CRM, ERP, Responsive Web Design, WordPress, Elementor
- Development Practices: Git, GitHub, Debugging, Code Refactoring, Performance Optimization, Legacy System Migration
- Additional Expertise: Business Process Automation, Technical Documentation, UI/UX Implementation, Technical Training, Client Collaboration

PROFESSIONAL SUMMARY

Results-driven Full-Stack Web Developer with over 9 years of professional experience designing, developing, and maintaining scalable web applications and business solutions. Specializes in PHP, Laravel, MySQL, JavaScript, and MVC architecture, with extensive experience in CRM systems, SaaS platforms, RESTful API development, third-party integrations, and responsive web design. Skilled in building efficient, maintainable applications, optimizing business workflows, and integrating payment gateways and AI-powered automation tools. A collaborative problem-solver committed to delivering high-quality, user-focused solutions that align with business objectives.

PROFESSIONAL EXPERIENCE

Full-Stack Web Developer
August 2024 – Present
XS Enterprises LLC

- Develop and maintain scalable SaaS applications using PHP, Laravel, MySQL, and JavaScript, focusing on responsive interfaces, robust backend functionality, and maintainable code.
- Build and enhance booking, scheduling, CRM, invoicing, payment processing, and business management modules across multiple industries.
- Design and integrate secure RESTful APIs with proper authentication, request validation, HTTP status codes, and standardized response structures.
- Implement third-party integrations and AI-powered automation using Payroc, ElevenLabs, and n8n to streamline business operations and customer interactions.
- Enhance appointment scheduling, student management, and administrative workflows for mySymphony, a music education management platform.
- Debug complex application issues, refactor legacy code, optimize database operations, and improve overall system reliability.
- Collaborate with development teams, conduct code reviews, mentor junior developers, and support testing and production deployments.
- Maintain technical documentation and communicate implementation decisions to ensure consistent development practices.

PHP Developer
January 2023 – August 2024
NAPA (North American Poolshooters Association) (Part-Time)

- Developed and maintained web applications using PHP, MySQL, JavaScript, HTML5, CSS3, and Bootstrap, focusing on functionality, usability, and maintainable code.
- Implemented client-requested features, enhancements, and updates while ensuring high-quality deliverables aligned with project requirements.
- Diagnosed and resolved application bugs, performed functional testing, and improved overall system reliability.
- Contributed to billiards league management, player rating systems, and personal task management platforms.
- Designed custom illustrations and digital assets using Adobe Illustrator and Photoshop to support website design and presentation.
- Communicated directly with clients to understand requirements, provide progress updates, and deliver solutions that met business expectations.

EDUCATION

- Bachelor of Science in Computer Science
- Cavite State University
- 2011 – 2015

INTERESTS

- Web Development & Emerging Technologies
- Artificial Intelligence & Automation
- UI/UX Design
- Problem-Solving & Innovation
- Continuous Learning
- Graphic Design & Digital Creativity

Web Developer
July 2021 – July 2022
Marketing By Rob (Part-Time)

- Designed, developed, and maintained web application architectures, ensuring scalability, reliability, security, and long-term maintainability.
- Managed and maintained large volumes of sensitive data, ensuring data integrity, accuracy, and secure handling across applications and databases.
- Improved code quality and maintainability through regular code reviews, refactoring, and adherence to established development standards.
- Collaborated with cross-functional development teams and product managers to analyze requirements, identify technical challenges, and deliver effective software solutions.
- Designed and implemented frontend architectures and responsive user interfaces, ensuring seamless functionality and consistent user experiences across devices.
- Developed and maintained backend systems, including database management, server-side functionality, and application integrations.
- Built well-structured PHP-based API integrations to retrieve, process, normalize, and store data from external services, ensuring reliable data exchange and system interoperability.

PHP Developer
September 2020 – January 2023
Maennche

- Developed and maintained a custom business relationship management portal using Core PHP, building application pages, reports, reusable functions, and classes from scratch.
- Designed and implemented backend functionality and user-facing features without relying on third-party frameworks or libraries.
- Developed and managed relational databases, optimized queries, and implemented APIs to support business operations and system integration.
- Diagnosed and resolved application bugs, ensuring reliable functionality and improved system stability.
- Collaborated with clients and development teams to gather requirements, resolve technical challenges, and deliver high-quality solutions.
- Created and maintained technical documentation for application features, APIs, and development processes.

Web Developer
October 2020 – March 2021
Royal Basketball (Part-Time)

- Developed and maintained a basketball training website using PHP and MVC architecture, delivering functional, responsive, and user-friendly web experiences.
- Implemented client-requested features, enhancements, and website updates while maintaining high standards of quality and functionality.
- Translated UI/UX designs into responsive, mobile-friendly interfaces, ensuring seamless usability across multiple devices.
- Optimized website performance, loading speed, and application responsiveness to improve the overall user experience.
- Designed custom illustrations and visual assets using Adobe Illustrator and Photoshop to support website design and branding.
- Collaborated with clients to gather requirements, provide project updates, and deliver solutions aligned with business needs.

Web Developer
July 2020 – October 2020
Delesign (Part-Time)

- Developed and maintained responsive business websites using WordPress and Elementor, focusing on clean design, functionality, and user experience.
- Implemented client-requested features, website enhancements, and content updates while maintaining high development standards.
- Translated UI/UX designs into functional, mobile-friendly web pages, ensuring consistent layouts and cross-device compatibility.
- Optimized website performance, loading speed, and responsiveness to deliver smooth and accessible browsing experiences.
- Designed custom illustrations and digital assets using Adobe Illustrator and Photoshop to support branding and website presentation.
- Collaborated with clients to gather requirements, communicate progress, and deliver high-quality solutions aligned with business goals.

Software Engineer
September 2019 – May 2020
Accenture Inc.

- Customized and maintained Salesforce CRM solutions based on client requirements, including custom metadata, classes, and application enhancements.
- Implemented third-party application integrations to extend CRM functionality and support business workflows.
- Refactored existing website components to improve responsiveness, usability, and compatibility across multiple devices and screen sizes.
- Collaborated on translating business requirements into functional software solutions aligned with client objectives.
- Followed established development procedures, coding standards, and quality assurance practices to ensure reliable, high-quality deliverables.

PHP Developer
June 2018 – September 2019
J6W Inc.

- Modernized a legacy CRM application by migrating its codebase from native PHP to Laravel, improving code organization and maintainability.
- Refactored existing application components to align with Laravel's MVC architecture and support future enhancements.
- Standardized website typography, formatting, images, and layouts to establish a consistent visual identity across the application.
- Improved frontend presentation and usability by implementing cohesive, user-friendly interface designs.

Computer Programmer
February 2018 – June 2018
Omniray Ventures Inc.

- Maintained and enhanced an existing ERP system, troubleshooting application bugs and implementing improvements to strengthen functionality and reliability.
- Developed system enhancements that automated manual processes, streamlined business workflows, and improved operational efficiency.
- Designed and maintained SQL queries and stored procedures to support database operations and application functionality.
- Modernized a legacy ERP application by migrating functionality from PHP to C#, improving code maintainability and simplifying system processes.
- Refactored existing application features to reduce complexity, enhance usability, and improve overall system performance.

Web Developer
June 2015 – October 2017
LEENTech Network Solutions

- Developed and maintained dynamic, interactive websites and web applications aligned with business requirements and operational workflows.
- Optimized website speed, performance, and functionality while implementing new features and maintaining application quality.
- Designed and delivered responsive, user-friendly web solutions to support business processes and improve overall usability.
- Trained over 15 staff members in PHP Laravel development, including database migrations, seeders, and CRUD application development.
- Facilitated hands-on technical training to strengthen staff programming skills and understanding of Laravel-based web application development.

I hereby certify that the information provided in this resume is true, accurate, and complete to the best of my knowledge and belief.
